

# Are you an SME providing COVID-19 services to or for the NHS?

Funding to review your cyber risks, and ensure your continuous operation, could be available to you!

NCSC Funding is now available to SMEs in the health sector who are providing COVID-19 services to or for the NHS. Bamboo can obtain the funding with you and use it to review your digital infrastructure and cyber hygiene so you can identify and mitigate threats to your business now.

Take advantage of this funding by 28th February 2021 and Bamboo will carry out a digital health and cyber hygiene check. We will use our 'Helix' platform to perform a digital risk assessment to identify any Criminal Tactics, Techniques and Procedures (TTP) operating in your digital DNA.

Speak to the team today to find out more.
