BAMBOO ON POINT

RUNNING ON THIN ICE?

Welcome, fellow adventurers of the digital realm, as we embark on a treacherous journey through the precarious world of unsupported servers. In this thrilling expedition, we shall unveil the hidden dangers, navigate the treacherous pitfalls, and illuminate the dire consequences of treading on thin ice.

So, buckle up and prepare for an exhilarating ride into the heart of cyber risks associated with running unsupported servers!

FIND OUT MORE

BE AN EARLY ADOPTER, LEARN ABOUT CYBER SECURITY AWARENESS MONTH NOW.

In an era where cyber threats loom large, the United Kingdom stands firm in its commitment to safeguarding its digital landscape.

As October sits on the post Summer horizon, the nation rallies behind Cyber Security Awareness Month, an annual campaign that educates, empowers, and unites individuals and organizations to fortify their defences and ensure a secure cyber environment for all.

But why is it so important? Click here to find out!

LET'S TALK TECH

Heading outside the UK this summer?

Whether for business or personal use, don't overlook roaming charges.
Take a moment to review your package and ensure it covers your needs.
Avoid bill shock upon returning home.
Stay connected without busting the business budget.

Manage your cyber risk with NCSC

We're passionate about the NCSC and their commitment to empowering businesses with free tools. Their updated 'Risk Management Toolbox' offers valuable insights and accessible processes to effectively manage cyber security risk. Don't miss out!
Explore the toolbox here.

Protect your mobile data on the move

Whether it's a work, BYOD or your personal device, your smartphone is probably not only expensive, but it's more valuable than you think!
It holds a mass of data which can give cyber attackers access to carry out an attack.
Here's 5 simple ways to protect your phone.

TOP TIPS

TIP 1: CONTROL FREAK
Control access. Safeguard your business. Limit who can access sensitive data for robust defense.

TIP 2: UPDATE OR ELSE!
Update security! Keep software, systems and apps current to maintain a secure IT environment.

TIP 3: HUMAN SHIELD
Empower your team! Follow best practices and boost cyber security knowledge to minimize human error risks.

SIMON SAYS

"When it comes to cyber security it can be daunting to know where to start or what your focus should be. It's important to remember that cyber security is an ongoing effort. As long as you are regularly assessing your estate and implementing improvements to enhance your security measures, it all helps protect your business against potential cyber risks."

Do you know the potential cyber risks your business has?
Unsure? Drop me a message and let's have a chat!

TELEPHONY AT A GLANCE

In 2025, all traditional telephony lines that have not been moved to an alternative IP solution will cease to work.

Openreach are currently working with Service Providers like ourselves to support the transition away from WLR products with a UK-wide stop sell due to take place early Septemeber this year!

Head over to our All-IP Hub where you can download our 'Ultimate Guide to All-IP' for all the need to knows!

DID YOU KNOW...
THERE'S MORE!

We know you've relied on us for your telecommunications needs and trusted us during cyber security or GDPR incidents. But there's more!

We also offer comprehensive IT managed services, combining our group expertise to help you enhance your customer experience.

FOLLOW US!

Whether you require **Connectivity**, **IT Services**, **Software**, or **Digital Assurance**, reach out to us. Let us bring peace of mind by designing, managing, and implementing solutions tailored to your needs. Don't hesitate, talk to us today!
